TO REMEMBER AND REALIZE

For the driver (if he has been in contact with the victim) undresses before returning to the cabin + remember to take out of the cell the driver's dressing kit (will be used for disinfection).

<https://youtu.be/x50hyNkNg04>

Crewman and/or chief remain with the victim in the sanitary cell, the driver if possible will have removed as much material as possible from the cell to the cabin before conditioning the victim.

The transport is carried out with a drop-off point for the victim determined by the regulating doctor.

Reconditioning and disinfection

Undressing of the crewman and the apparatus chief.

Total disinfection of the VSAV, wearing the same level of protection as during transport (type 6 for Covid 19).

Waste: Double packaging. Do not throw away the glasses

i The Fire Department pharmacy has made a SANIVAP available on the premises of the SAMU in the SMUR's vehicle wash room.
